

CRIB-ACCESS

CRIBWARE® CRIB-ACCESS provides secure and controllable entry into unattended cribs and storerooms. The electromagnetic lock may be installed on doors or gates. Utilizing CRIBWARE, the crib or storeroom is unlocked when the user enters a password, either via a keypad or bar code scanner, and locking automatically behind them after a specified interval. To leave, the user simply pushes the exit button.

Inside, the user can perform complete Check out/in, inventory, replenish, and restock activities, using the CRIBWARE workstation. This provides complete accountability and tracking information for reporting purposes. They may also access CRIBWARE-controlled Lista cabinets (Stock Supervisor) and even upload information from portable batch scanners (CRIBMATE II).

Benefits

- Access to a crib or storeroom is restricted and entry history maintained.
- Flexible configuration. Easy to implement.
- Material is secure until needed.
- Provides multi-level security and dynamic reporting capabilities.
- Reduces shrinkage and increases security.
- Utilizes automatic reader technology to improve accuracy, efficiency and user acceptance.
- 24/7 control of cribs and storerooms.

Features

- Entry requires a password and is recorded by the CRIBWARE software.
- Password entry device options include the CRIBWARE screen, keypad or bar code scanner, and magnetic strip and proximity card readers.
- Electromagnetic lock with flexible mounting brackets and 1,500 lbs. of direct holding force.
- Designed for gates and doors.
- Exit Push Button for convenient exiting of room.
- No moving parts – low maintenance.

Requirements

- A CRIBWARE Basic system configuration system is required.
- Customer is responsible for meeting all safety requirements including all local electrical and building codes.
- Installation to be performed by customer supplied skilled electrical and mechanical craftsmen.
- Entry devices must be dedicated to the CRIB Access function.
- Uninterruptible power supply is required for the Crib Access system.
